

EMIHS 5-minute Lineup Drill

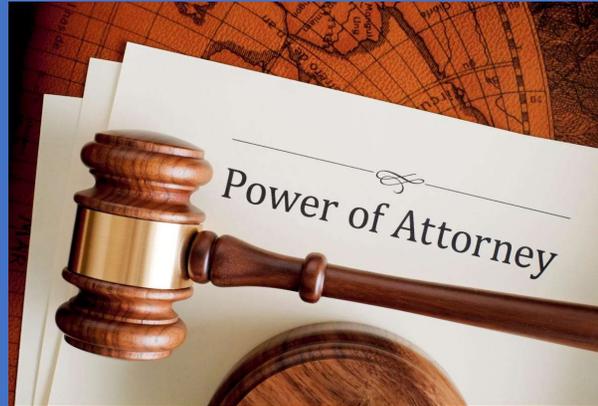

What is a **PATIENT**?

Any person encountered by EMS with an actual or potential injury or medical problem

Any person who has requested EMS (1st party caller) or who has EMS requested for them (2nd party caller).

A patient exists if a 2nd party caller witnessed signs or symptoms which imply illness or injury, even in the face of denial by the patient.

Any person for whom a Power of Attorney has called 911. This can include a state appointed "*Patient Advocate*" (4th party caller).

Any person for whom a health care professional calls 911.

Any person involved in a situation that a trained provider suspects would lead to illness or injury.
